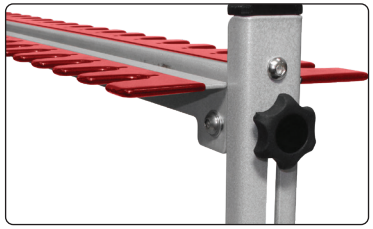
High Density Heavy Duty Golf Club Rack

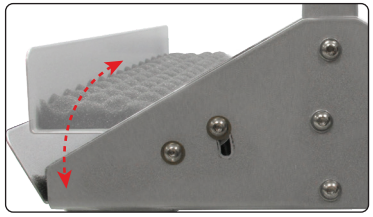
The Industrial Golf Club Curing rack on wheels is the ideal solution for carting clubs out of the way just after assembly to let the epoxy bond cure without disturbance.
The rack accommodates up to 44 /22 clubs of any type as the rack can be adjusted for lie and length in a matter of seconds.
The Base of the display is covered with an alveolar foam that moulds around the heads to prevent slippage when moving the cart.
The cart ships flat with all the accessories needed for self assembly.



▲PVC coated height adjustable rack

▲ Swivelling caster wheels with brakes.

▲Non slip alveolar foam padding support head during the curing process



▲Base automatically adjusts to the lie angle of the clubs

▲Two rows of clubs can be displayed back to back
