

210020 Value shaft extractor

A value shaft extractor made for the casual club repair enthusiast

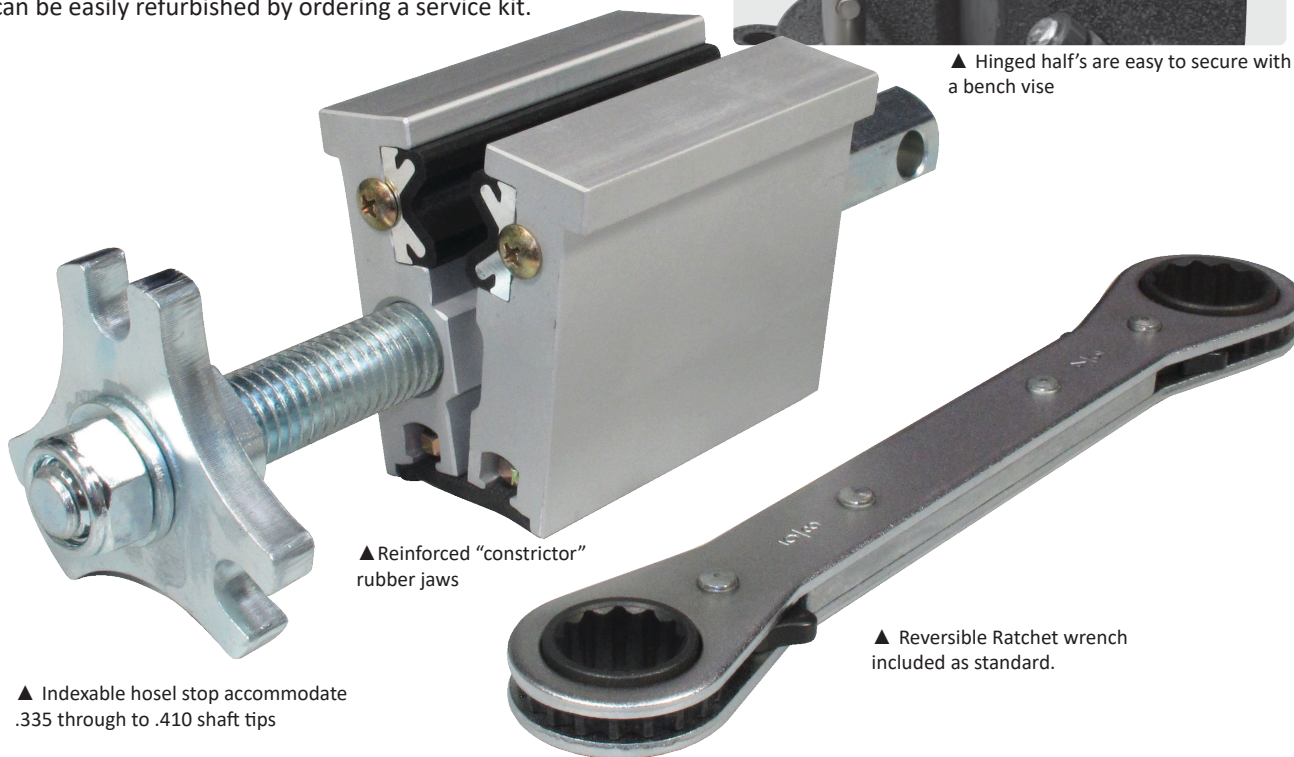

The extractor is held in a bench vise with the shaft clamped between the reinforced rubber jaws while heat is applied along and around the hosel.

Ratcheting the long bolt pushes the head out leaving the shaft intact.

This extractor is good for over 300 extractions and can be easily refurbished by ordering a service kit.

▲ Hinged half's are easy to secure with a bench vise

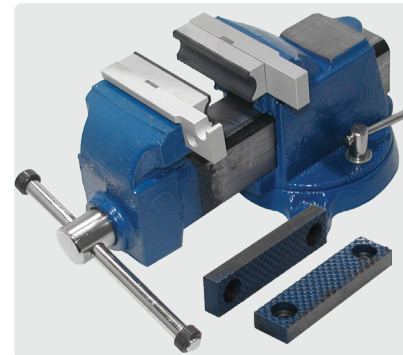

▲ Reinforced "constrictor" rubber jaws

▲ Reversible Ratchet wrench included as standard.

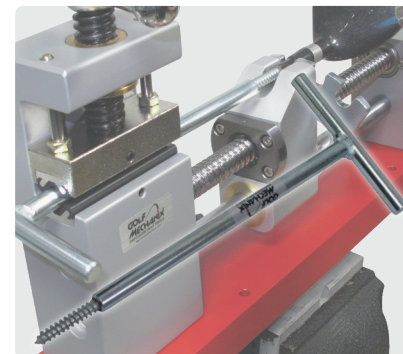

▲ Indexable hosel stop accommodate .335 through to .410 shaft tips
