

Pneumatic multi tool Work center

Introducing a super compact yet remarkably versatile golf club assembly work station that seamlessly consolidates essential clubmaking tasks into a space-saving and highly efficient arrangement. This innovative design eliminates bench clutter by integrating a gripping station, shaft extractor, and ferrule installer into one sleek and powerful setup for ease of operation. A joy stick controlled air vise provide the primary clamping power need to secure the club for head extraction, gripping and inserting ferrules over shafts effortlessly! A micrometric type ferrule insertion tube mounted on a purpose built two way cylinder provides the precision needed to drive ferrules to the correct insertion depth without nicks.

Key Features:

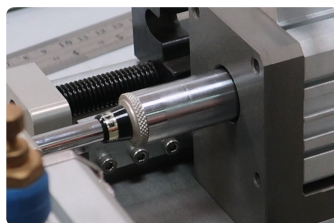

- Multipurpose club assembly work station
- Indexable setup for easy access to all functions.
- Powerful pneumatic air vise for gripping & shaft removal.
- Micro metric high power ferrule pressing pneumatic cylinder
- Joy stick activated vise and press.
- Regulated air pressure
- Adjustable speed control.
- Ratcheted shaft extractor.
- Wide solvent gripping pan.
- Air compressor not included!

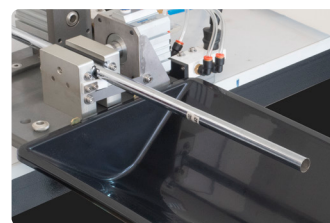

▲ Regulated air pressure for adjusting the pneumatic vise clamping force.

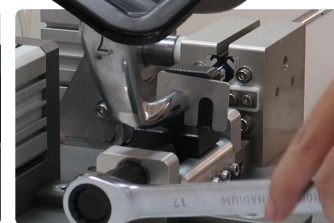

▲ Reinforced non slip rubber pads secure the shaft in place during gripping, ferrule insertion and shaft removal.

▲ Micrometric ferrule installer & press provide power and precision in a compact package.

▲ Low and wide solvent catch pan keeps spills under control.

▲ Ratcheted shaft extractor provide sufficient pulling power and stroke depth to remove clubheads without fuss.
