

42" Shaft & Ferrule Pepping Center

This heavy duty prep-ping center roughens shaft tips evenly on both steel & graphite shafts and turns down ferrules on assembled clubs. We've re-powered this design with a motor that has 20% more torque to give clubmakers the ability to cut through and buff heavily soiled clubheads to restore them to like new condition.

Key Features:

- 1/3HP 1720 RPM motor developing peak torque of 2.3 N.m @ 1200 RPM
- Powerful enough to cut through scratches and buff clubheads to a mirror like finish
- Fully guarded belt drive with built in dust vacuum port
- Spring loaded belt drive with relief lever for quick belt change
- Bench mount heavy duty frame
- Adjustable non scratch shaft support turning arm
- 3" flap wheel for roughing super light weight shafts.
- Wide assortment of 42" roughing & finishing belts to choose from
- Shaft prep-ping feeder (Optional)

1/3 HP & 2.3Nm @1200 RPM!
With Club Detailing capability

▲ Turns down ferrule to size over linen belts

▲ Flap wheel removes thin film coatings off graphite shafts

▲ Remove minor scratches and restore luster to worn out clubs

▲ Shaft feeder controls over-coating thickness removal and tip roundness

▲ 42 Inch abrasive belts for prep-ping and finishing shafts, ferrules & clubheads.

▲ Dry compound applied in steps on felt belt used for buffing clubheads to a mirror like finish.
