

**120025 Hand Held Shaft Cutter Kit**

Handy, manual, heavy duty cutter for tip and butt trimming steel shafts and metal shaft extenders to length. Unlike similar cutters, this particular design features broader guiding rollers and a stiffer stem to prevent it from spiralling away, allowing for a cleaner and more accurate cut. Tungsten carbide blades cut through both chrome and steel as well as graphite. One spare blade included.

**120025-1**  
Shaft cutter only one spare blade included

**SP-G0705-0101-P5**
