GOLF MECHANIX®

130800 *Ferrule Slicer & Splitter*

The ferrule splitter is a convenient and easy to use hand tool designed for splitting the ferrules of both woods and irons effortlessly. Held in a vise, the ferule splitter is safe to use on both steel and graphite shafts while preventing the risk of injury to clubmakers who may otherwise have to use a utility knife.

Secure the ferrule splitter in a vise. Locate shaft in the nested V channel and as close as possible to the ferrule lip. Slide shaft forward by pushing the club-head towards the blade. Rotate shaft and repeat as directed.

Spare

Spare blades for Ferrule Splitter (pack of 5)
