

Clubmaker's Lie and Loft Bending Gauge

A sturdy, well engineered, no fiddle lie and loft bending gauge with a gate wide enough for today's oversized irons, specialty wedges and hybrids.

Time tested by hundreds of clubmakers worldwide; Our unique, triangulated, isostatic clamping system with adaptable pivoting non-marring conical sheaves, soling flats and vulcanized hybrid top clamp, this bending gauge can secure any iron, wedge or hybrid without marring and can cope with bending moments in excess of 300 N.m (220 Ft.Lbf) which is more than sufficient for working those tough to bend alloys.

Keeping up to date with industry trends towards softer more malleable alloys; We've added several new accessories that extend the capability of this design to high levels of sophistication and versatility.

▲ Offset and indexable conical sheaves adapt to sole width and bounce angle of irons

▲ Self-aligning pads adapt to sole radius of hybrids. Padded top clamp complies with crown curvature.

▲ Hybrid clamp has a sheathed high tensile leaf spring. Distributes load evenly to prevent crown collapsing.

▲ Precision machined and engraved lie and loft protractor accurate 0.5°

▲ Clear sighting of grooves ensures clubhead is set at the correct lie angle.

Key Features:

- High loading self-squaring isostatic frame
- Self-squaring protractors mounted on precision linear guides with recirculating linear ball bearings
- Heavy duty low wear top clamp machine screw assembly
- CNC engraved lie & loft angle scale starting at 50-70° for lie and 15-70° for loft with 0.5° precision.
- Works with all RH & LH irons and hybrids.
- Complete set of non marring clamps, sheaves & pads.
- Large selection of optional accessories.
- Can be mounted on all 1507xx Stands

▲ Non-marring clamps, sheaves and pads included.

OPTIONS 150610 Deluxe Brass Bending Bar

18" bending bar with compact head and slanted soft brass jaws. Bars lock onto hosel for positive engagement and feedback. Safe to use on most irons. This bending bar is the minimum requirement for entry level clubmaking
