

190300 *Hosel Cleaning Wire Brush Set (Woods and irons)*

The Golfmechanix hosel cleaning wire brushes are very good at scrubbing hosel bores to remove hardened epoxy left over and metal oxides prior to bonding new shafts.

The hosel cleaning wire brushes feature a short, stiff stem that can withstand a vigorous workout and a diameter optimized to prevent the strands from collapsing inside the hosel which may otherwise dull effectiveness and accelerate wear.

Key Features:

- 2" long bristle works the hosel bore full length
- Stiff, dense bristle can withstand vigorous scrubbing
- Universal 3/16" UNC thread screws into handle
- Interchangeable brushes for woods and irons
- Comfortable moulded handle
- Can be used with a power drill
- Wood and Iron brush included.
- Spare brushes available
