GOLF MECHANIX®

100601 HOBBY *DIY dial down gripper*

A light clamp and tray assembly for regripping all clubs like a pro! All that is needed is a bit of a bench top or tressle with enough floor space to lay a club down in the vice.

Installation is easy and all it takes is a couple of screws to secure the bracket to the bench. The solvent tray is hung directly onto the bracket This makes setting up and storage easy and fuss free!
As an added bonus the clamp can be used on its own for “doctoring” shafts and clubs.

The dial down gripping station ships with all the small hand tools that make gripping a pleasure.
This is what’s in the box:

-Solvent tray
-Dial down shaft clamp
-Base plate for shaft clamp
-Bracket for solvent tray
-hose
-Solvent recyling squeeze bottles
-Squeeze bottle cage.
-Assorted screws.
-Grip tape remover
-Grip knife
-Grip installer

This gripping station is not recomanded for commerciall use.
