GOLF MECHANIX®

HDI HEAVY DUTY INDUSTRIAL

121900

Dual Motors Industrial High Speed Shaft trimmer

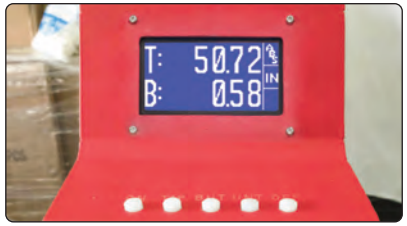
A labor and time saving high Speed industrial shaft trimmer that cuts both tip and butt into two distinct consecutive steps., reducing time in half while doubling productivity in two!

Built on our original production proven high speed shaft trimmer, we've added a transfer mechanism that shifts the shafts towards either end of the cutting table saving valuable stacking time while reducing staggering errors at the same time!

Setting up the saw has been greatly simplified and allows the operator to use custom jigs for butt and tip trimming as needed.

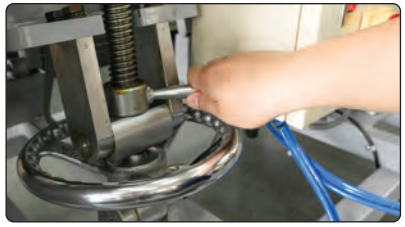
Key Features:

-Heavy duty steel construction
-Industrial grade heavy duty 3HP, 3 phase low RPM motors.
-Belt driven, low noise 16" cut off wheels with wear compensation
-OSHA compliant Emergency switches and safety interlocks.
-Easy to use and operate control panel
-Easy to use digital ruler for tip and butt trimming
-Air regulated clamping pressure-Non marring shaft holders and clamps
-Fully dust contained cut off wheels
-Built in 4" dust extraction ports
-Levelling feet.
-Proven track record of reliability, serviceability and productivity.
-Easy to source spares and consumable.
-Motors available 220/380/440/480 Volts AC 3 phase



▲ Digital accuracy with precise clear to read butt and tip trimming length to +/- 1mm

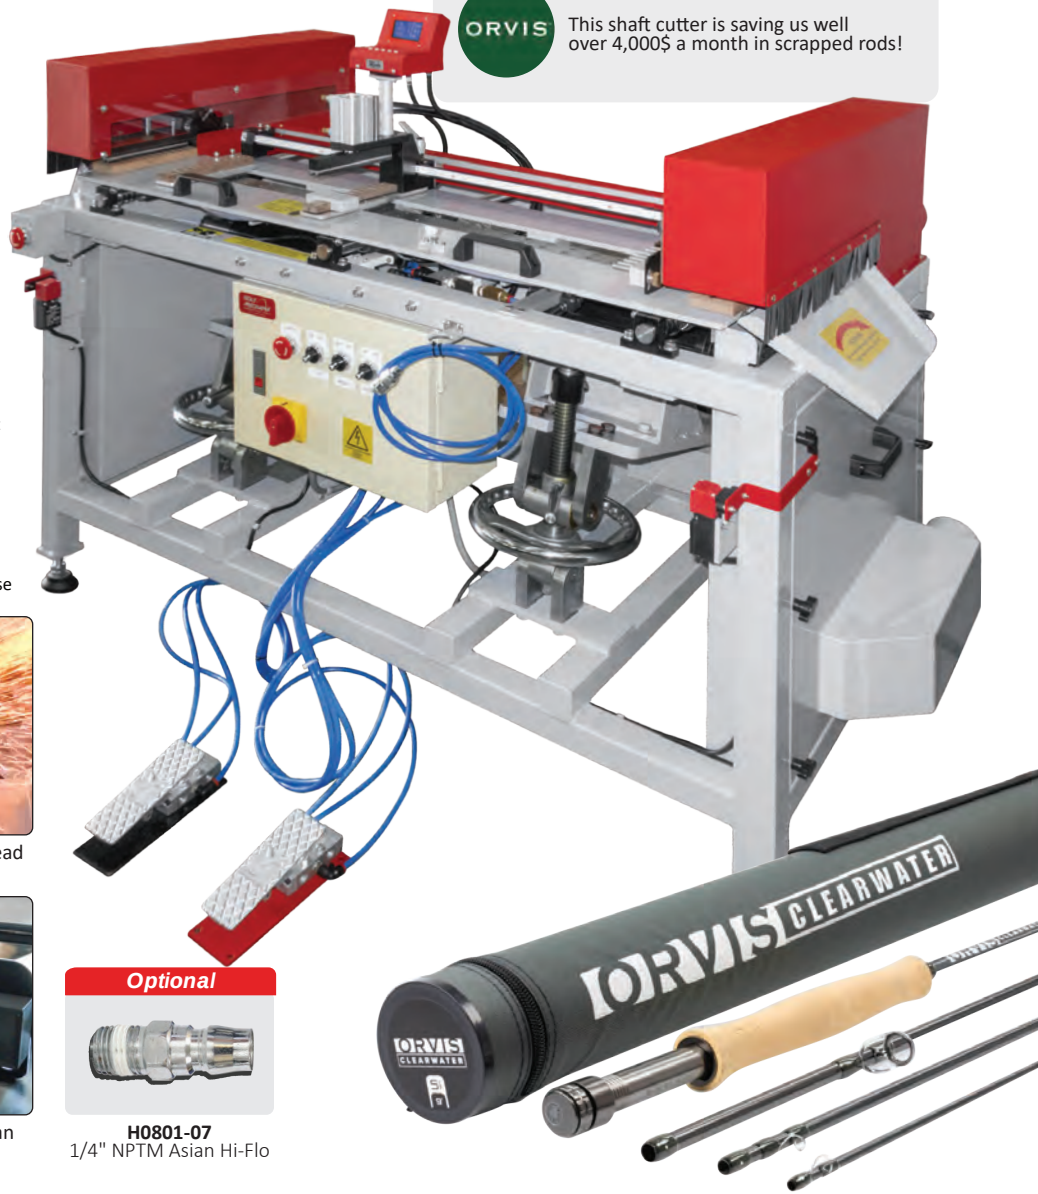
▲ Digital accuracy with precise clear to read butt and tip trimming length to +/- 1mm



▲Fully adjustable blade depth for safety and economy

▲Fast and versatile Multi jig setup that can accommodate any butt or tip trimming instruction sets

ORVIS This shaft cutter is saving us well over 4,000$ a month in scrapped rods!



Optional

H0801-07
1/4" NPTM Asian Hi-Flo
