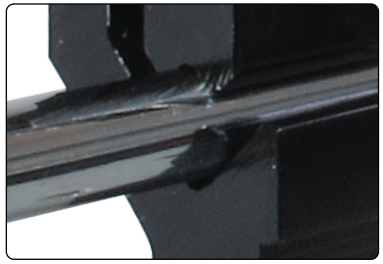
GOLF MECHANIX®

170300 & 170310 *Mini Shaft Vise*

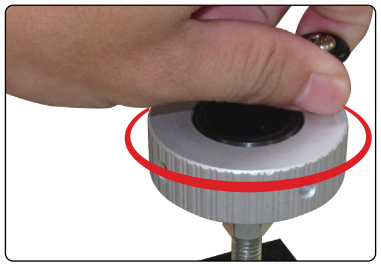
A compact shaft vise design well suited for clamping a shaft anywhere along its length with or without a grip. It is well suited for trimming shafts manually, Installing grips and spinning shafts.

This clamp can also be used to build a home made shaft deflection board, torque tester and many other jury rigged contraption where having a depandable clamp is a must.

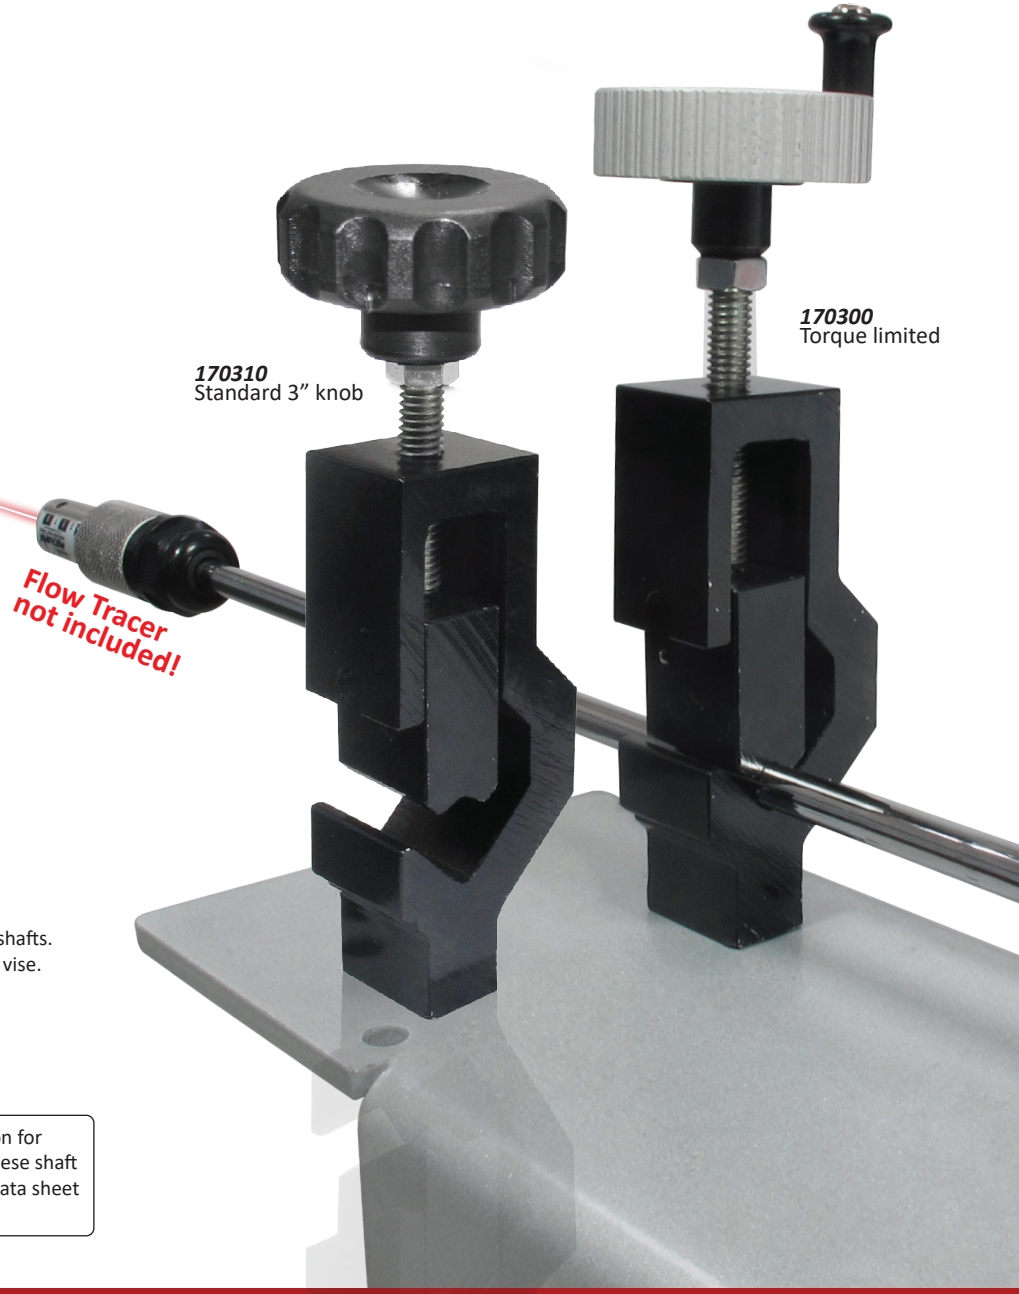
The torque limited shaft vise model 170310 is well suited for working working on super light weight shafts which can be easily crushed when too much pressure is applied. The knob is calibrated for 1ft/Lb of torque, which is sufficient for most jobs.



▲Profiled V Clamp



▲Torque limited knob (170300)

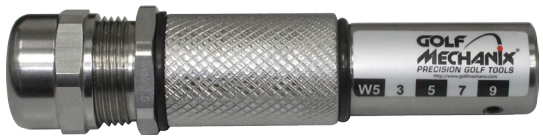


Key Features:

-Nested V clamp in a small foot print.
-Rigid all aluminium construction.
-Good for trimming,spinning and gripping

-Torque limited version for handling light weight shafts.
-Bolts down to a bench or can be held in a bench vise.

030406-HD *Fit Over Adapter spining laser HD*



Spinning laser is great addition for extending the capability of these shaft clamps. Please see relevant data sheet for more info.
