CM Multi-Purpose Bench Vise

At Golfmechanix we've realized long ago that your workbench is a valuable piece of real estate always in need of serious clutter control! We've re-engineered the common bench vise turning it into a multipurpose work center for carrying out all those mondaine clubmaking tasks that would otherwise require a plethora of small tools that always seem to end up scattered all over the workbench!

The Golfmechanix vise is mounted on a sliding extender that pulls away from the bench giving you a 180 degree access around the vise, instead of having to work over it at awkward reducing fatigue and the risk for potential injuries.
Get the full kit or mix and match components to create your own system!

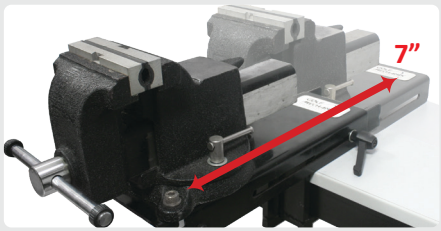
Options (Not included)

171200-30 *Vise Extender*



▲Retractable 7" extender keeps vise away from bench and allows work to be carried around rather than over the vise.

110720 *Gripping Pan*

▲Re-gripping pan mounts right under the vise and at the edge of the bench. Slotted bracket is easy to unhook when pan is not used.

171200-10 *Heavy Duty Bench Vise*

▲Heavy Duty 5" vice made from highly ductile Steel. Vice has a 360 degree swivel base with double locks and a sturdy anvil. Six specialized jaw sets including a compact shaft extractor can mounted on this vice. This vice has 4" wide jaws, 5" throat opening and weight in at 17Lbs

171200-20 *Specialized Jaw Set kit*

1. Vulcanized "V" rubber jaw set has two vertical and two horizontal channels.
2. Vulcanized round jaw set designed for clamping the shaft for regripping.
3. Aluminum round Channel for clamping wood and iron shaft tips.
4. Dimpling jaw set for Steel shafts
5. Non Marring Aluminium flat jaws
6. Dovetail key set hold jaws to vise

171200-40 *Compact Shaft Extractor*

▲Compact shaft extractor clips on to the vice which is then used to clamp the shaft with sufficient force to allow heads to be pulled effortlessly.Handy ratchet wrench included in the set.
