GOLF MECHANIX® 190600

48 inch Long Drill set for Steel (7/32) and Graphite (5/32) Shafts

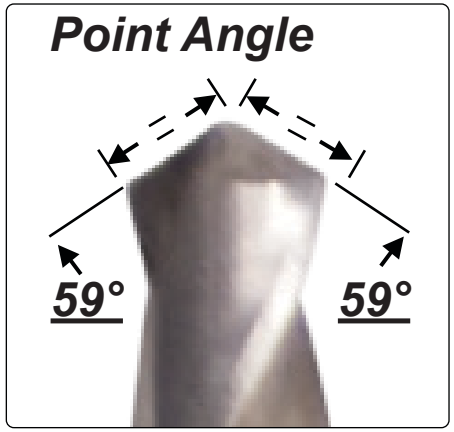
A “must have” 48" drill bit set for making swing weight adjustments on fully assembled clubs, Steel or Graphite shafted. These drill bits are perfect for clearing out shaft tips, coring out excess epoxy glue and loose weights and lightening up hosels quickly and effectively.

Each re-sharpenable, high-quality HSS bit is brazed to a Stiff stainless steel shank and trued to prevent wobbling and flexing too much while peck drilling. Peck drilling prolongs tool life by breaking up chips and reducing heat buildup to prevent dulling the bit’s cutting edge.

Specifications:

-Drawn and rolled stiff stainless steel shank
-High-quality, HSS (high-speed steel) drill bit
-Wide 130 Point angle minimizes wear on hard to drill Stainless.
-Braised and trued assembly for wobble-free Shatter-Free spin.

Set includes:

190300-396
-One 5/32” (3.96 mm) bit for graphite shafts (48” length).


190600-555
-One 7/32” (5.55 mm) bit for steel shafts (48” length).
-Protective PVC tube for shipping
