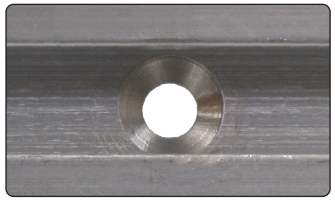
GOLF MECHANIX®

231100 Golf Club Track Holder

The Golf Club Curing strip is used for displaying shafts, resting clubs with the heads up for display and for letting epoxy cure.

The strip is 18" long and comes with 12 grommets which can be spaced as desired inside the track with a spacing of at least 1" between grommets. Up to 6 additional grommets can be added to the track in a high density configuration. Each strip includes 2 mounting brackets and screws. Additional grommets are sold separately.



▲ Can be hung on the wall
