GOLF MECHANIX®

260501 *Industrial Solvent Dispenser*

The Solvent Dispenser Can is a tool every clubmaker should have. It will be as useful as a third hand.
It also keeps dangerous mineral spirits such as naphtha, acetone, thinners etc... from evaporating quickly, while preventing spills.
To use the solvent dispenser simply unscrew the cap and fill the canister with your solvent of choice. With a small towel, push on the stopper/ reservoir and the solvent pools to the top of the reservoir, soaking the towel. Use the solvent soaked towel to clean excess epoxy during assembly, grip solvent residue on shafts or any other cleaning need. Capacity 250 ml / 8.5oz

FILL LEVEL

8.5oz
250ml
